Letter to Community

Dear Community Members and Partners,

At MyMichigan Health, our Purpose Statement is: "Creating Healthy Communities – Together."

Community health improvement is a daunting challenge. In fact, it is far too great for any single organization to achieve. However, it can be achieved together with the help of community partners like you. Whether in the public health, foundation, nonprofit organization, government or the health care sector, or those with first-hand experience that live, work, play and age within our communities – all can make a difference.

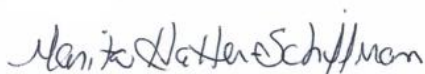

The Community Health Needs Assessment (CHNA) process is one way to make a difference. The CHNA offers a valuable opportunity to listen and gain input on what health concerns matter most to those in our communities. As part of that process, we seek the most impactful, evidence-based ways to work together to improve the health of our communities. Collectively, we have worked hard to address key priorities identified in previous CHNAs to move the needle on health indicators. As a result, we have implemented programs and developed new processes to provide care and affect social determinants of health to those most in need. We are proud of what we have accomplished thus far, but also understand there is still much work to be done.

It is through our CHNA process, using data and stakeholder input, that we measure and obtain a detailed snapshot of our region's health needs and how best to address barriers to achieving a healthy life. We know that individuals and families can best achieve a healthy life when they are able to make positive health choices in settings where barriers to health are addressed and removed.

MyMichigan Health takes its role as an anchor institution, a community leader and trusted partner in our communities very seriously. We know that we serve as a major employer, purchaser, leader and participant in interconnected relationships with you, for the good of our community's health.

MyMichigan Health understands its responsibility to set standards of care not only in our clinical settings, but also in the towns, community centers and classrooms where we serve. Our efforts to strengthen and integrate our clinical and community programs, together with our community partners, is how we become successful in our challenge to improve health.

It is our pleasure to provide this 2025 MyMichigan Medical Center Alma Community Health Needs Assessment. In accordance with policy, the Board of Directors reviewed and approved this report on 5/27/2025. We invite you to explore this report and join us as we engage in addressing the critical health issues in our community.

President, Alma, Clare, and Mt. Pleasant Medical Centers

Chair, Board of Directors

Manager, Community Health

Executive Director, Population Health

Acknowledgements to Partners

MyMichigan Medical Center Alma is pleased to share with you the 2025 Community Health Needs Assessment. We adopted and modified the Mobilizing for Action through Planning Partnerships (MAPP) process to meet the needs of MyMichigan Health, our partners and the community. This is a community-driven strategic planning process for improving community health. This report represents our commitment to identify and address the barriers in our communities that impact their health.

MyMichigan Health would like to give a special thank you to all of those who have been involved in the development of the CHNA, especially those in the MiThrive network. All these partners took part in an extensive process that started with planning, collecting, and analyzing data to identify the top strategic health issues that our communities face. Collecting qualitative and quantitative data through our process enabled us to have a deep understanding of the challenges that our community faces.

This understanding enables us to develop our Community Health Improvement Plan (CHIP) that will guide our efforts over the next three years to impact health outcomes in our community.

Executive Summary

The Community Health Team of MyMichigan Health supports the Community Health Needs assessment (CHNA) as a key component of improving population health. Our assessment and corresponding plans reflect the purpose and core values to MyMichigan Health. We truly believe that health happens where we live, learn, work and play and that all people should have the opportunity to make choices that allow them to live a long, health life, regardless of their income, education or ethnic background.

MyMichigan Medical Center Alma, with community partners, conducted this CHNA using a modified MAPP process that assessed the current health status of the community based on identified needs according to benchmark comparisons in secondary public health data, primary data collected through community surveying for community input, and the development of a Community Health Improvement Plan (CHIP). The process included several community partners that collected, reviewed, and analyzed public health data, complete and distribute the community health survey, identified priorities, and set goals for the 2025 CHIP.

Community Health Status

This assessment evaluated each county identified as the community served by MyMichigan Medical Center Alma and the community collaborative organizations that were involved in the assessment, which includes Gratiot County. Evaluation included demographics and public health data from a variety of sources and agencies including Ten16, countyhealthrankings.org, and other county level data.

Community Health Survey

The 2024 Community Well-Being Survey was conducted between August 5, 2024 and October 6, 2024 to obtain community input regarding the health of the community. The data collected with the survey indicated a need for focus on chronic disease prevention, access to care, and behavioral health services.

Community Health Improvement Plan

Three focus areas were adopted and approved by the MyMichigan Medical Center Alma Board of Directors, at the recommendation of the advisory committees and community partners. These focus areas will have specific targets for community health impact based on the data collected and analyzed:

Chronic Disease

- Reduce prevalence of diabetes and diabetes mortality
- Increase rate of routine cancer screenings
- Education on healthy lifestyles

Behavioral Health

- Increase access to mental health services
- Reduce suicide prevalence
- Increase awareness of community resources and coping skills

Access to Care

- Improve awareness of importance of primary care
- Improve access to social services and community resources
- Improve transportation resources for non-emergency medical transportation

Overview of MyMichigan Health

MyMichigan Health, a non-profit health system headquartered in Midland, Michigan, is a leader in providing award-winning, high-quality health care to the 26-counties it serves. With Medical Centers in Alma, Alpena, Clare, Gladwin, Midland, Mt. Pleasant, Saginaw, Sault Ste. Marie, Standish, Tawas and West Branch, MyMichigan also has affiliations with Medical Centers in St. Ignace* and Mackinac Island.* MyMichigan provides a full continuum of care across a wide array of settings, including urgent care centers, health parks, home health, virtual care, as well as medical offices representing more than 80 specialties and subspecialties.

- A major employer in all the areas we serve and recognized by Forbes as one of “America’s Best Employers by State” in 2022, 2023 and 2024.
- Committed to the future of medicine by partnering with leading institutions to offer medical education programs that train medical students, physicians, nurse practitioner and physician assistant students, nursing students and other clinical experts for our region.
- More than 13,800 employees, volunteers, health care providers and other personnel working together to create healthy communities for nearly a million residents across the 26-counties we serve.
- A community partner that provided more than \$128 million in community benefits during fiscal year 2023 and that supported its patients and families with new equipment, services and programs with funds raised by the MyMichigan Health Foundation.
- Your Go-To Place for all your health care needs.

Figure 3: MyMichigan Communities

Feedback is welcomed via CommunityHealth@mymichigan.org

Overview of Community

Gratiot County is located in the central region of Michigan’s Lower Peninsula and is home to approximately 41,000 residents. The county includes the City of Alma—home to Alma College—as well as the cities of St. Louis and Ithaca and numerous rural townships. Gratiot County is characterized by its agricultural landscape, small-town communities, and accessibility to natural and recreational resources including parks, trails, and riverways.

The county’s economy is driven by agriculture, health care, education, manufacturing, and public services. Major institutions such as Alma College, MyMichigan Medical Center Gratiot, and various local employers play a significant role in the economic and social fabric of the community. However, like many rural areas, Gratiot County faces challenges such as limited public transportation, a shortage of skilled workforce, and barriers to affordable housing and health services. A significant number of residents live below the ALICE (Asset Limited, Income Constrained, Employed) threshold or in poverty, highlighting the need for continued investment in social supports and health equity.

Community organizations, local governments, and regional partners continue to collaborate to address these challenges and promote improved health, well-being, and economic resilience for all who live and work in Gratiot County.

MyMichigan Medical Center Alma is a 107-bed teaching hospital located in Alma, Michigan and specializing in high-quality rural medicine.

Community Served at MyMichigan Medical Center Alma

The community served will focus on **Gratiot County** where **MyMichigan Medical Center Alma** is located. The medical center serves as a key provider of care for a largely rural population dispersed across the region. The service area for this assessment includes the following primary ZIP codes within Gratiot County: 48615 (Breckenridge), 48662 (Wheeler), 48801 (Alma), 48806 (Ashley), 48807 (Bannister), 48830 (Elm Hall), 48832 (Elwell), 48847 (Ithaca), 48856 (Middleton), 48862 (North Star), 48871 (Perrinton), 48874 (Pompeii), 48877 (Riverdale), 48880 (Saint Louis) and 48889 (Sumner). Service for MyMichigan Medical Center Alma extends to: 48829 (Edmore).

Framework/Methodology

The Community Health Needs Assessment (CHNA), while a requirement every three years under the Patient Protection and Affordable Care Act for our tax exempt status, is an important reflection of MyMichigan Health's mission, vision, core values and the system's goal to become a leader in our regions to improve the health of our communities. Community is a foundational element in MyMichigan Health's strategic plan, and we believe that all people should have the opportunity to make healthy choices for a long, prosperous life, despite an individual's socioeconomic status, education or background. The CHNA, as a key component for identifying top health concerns in a given area, will be vital in accomplishing the four objectives of the "Quadruple Aim": Improve health outcomes in the community, enhance patient experience, enhance provider experience and reduce the cost of care. The primary purpose for the Community Health Needs Assessment for MyMichigan Medical Center Alma is to gain an understanding of the health needs caused by disparities in social determinants of health (SDOH) as well as strengths in the given service area. We do so by analyzing a large and specific collection of data and community input which includes Gratiot County. With this understanding of the needs in our communities, we are equipped to develop a three-year strategic plan to improve the health outcomes in our communities and build health improvement capacity for the future health of its residents.

2025 CHNA Process

MyMichigan Medical Center Alma partnered with the LiveWell Gratiot coalition to complete the 2025 CHNA. MyMichigan Health utilizes the Mobilizing for Action through Planning and Partnership community health needs assessment framework. It is a nationally recognized, best practice framework that was developed by the National Association of City and County Health Officials and the U.S. Centers for Disease Control. The goal of MAPP is to achieve health equity by identifying urgent health issues in a community and aligning community resources. MAPP defines **health equity** as the assurance of the conditions to achieve optimal health for all people. The MAPP framework provides an opportunity to strategically work toward a community-owned vision through collective action organized under one umbrella.

Community Status Assessment (CSA): Collects and analyzes quantitative data from trusted sources to assess the status of communities, particularly focusing on populations experiencing inequities. The CSA consists of secondary indicators collected in addition to a community survey.

Community Context Assessment (CCA): Utilizes qualitative methods to explore community strengths, lived experiences and external factors influencing change. It gathers non-numerical data, such as audio, photos and text, to provide deeper insights into the unique aspects of the community. The CCA helps fill data gaps and contextualizes issues through the perspectives of those with lived experience, ensuring a more comprehensive understanding of community dynamics. The CCA consisted of photovoice, asset maps and quotes collected from residents.

Community Partner Assessment (CPA): Provides a framework for community partners to critically examine their individual systems, processes and capacities, as well as their collective ability to address health inequities. It helps organizations identify both current efforts and future strategies to drive systemic and structural change. By fostering collaboration, the CPA strengthens the network of community partners working toward health equity. The CPA consisted of a community partner survey and live virtual events for discussion.

Each assessment offers valuable insights, but their overall impact is significantly enhanced when the findings are analyzed together.

MAPP Phase 1: Building the Community Health Improvement Foundation

During Phase 1, funding agreements with local health departments and hospitals for the CHNA partnership were executed, the Steering Committee, Workgroups/Round Tables were organized, and the Core Team was assembled. Strategic partnerships were cultivated with both new and existing collaborators, with a focus on including community members and organizations that represent or serve populations facing health inequities. As the infrastructure and partnerships took shape, guided by clear expectations and timelines, the shared Vision was affirmed, Healthy People in Equity Communities.

MAPP Phase 2: Telling the Community Story

During Phase 2, each of the assessments were conducted with support from all CHNA partners and residents. The Core Team instituted a schedule that would have all the individual portions of the CHNA completed during the 2024 calendar year. This was done using MAPP 2.0 as a framework for all planned assessments, and with input and decisions from the Steering Committee. Each of the assessments collected different types of data for the community: primary and secondary, qualitative data of health indicators and community sentiments, quantitative data reflecting resident viewpoints, and data regarding the capacity and shared goals of community partner organizations.

Community Status Assessment (CSA)

The Community Status Assessment identifies priority community health and quality of life issues. It answers the following questions:

- How healthy are our residents?
- What does the health status of our community look like?

The answers to these questions were measured by collecting more than 200 indicators from a variety of secondary sources onto the Data Platform, as well as primary data collected through the 2024 community survey and provider survey

MAPP PHASE 3: Continuously Improve the Community

Involves prioritizing issues using CHNA results, creating issue briefs, and collaboratively prioritizing key issues to be targeted in a Community Health Improvement Plan or Implementation Strategy.

MyMichigan Health is committed to strengthening regional data capacity to drive community improvement efforts and enhance accountability.

Community Survey

The 2024 Gratiot County Community Health Survey asked 26 questions, including those geared towards determining what is important to the community, what factors are impacting the community, quality of life, built environment, as well as demographic questions. The survey questions intentionally look to provide a deep understanding of the issues that residents feel are significant by answering the following questions:

- What is important to our community?
- How is quality perceived in our community?
- What assets are in the community that can be used to improve well-being?

Community surveys were conducted both electronically and in paper format, available in English and Spanish. The electronic survey could be accessed via a direct link or QR code. The survey remained open from August 12, 2024, to October 6, 2024. To encourage participation, respondents who completed the survey had the opportunity to enter a drawing for a \$50 gift card, with one winner selected from each of the 31 counties.

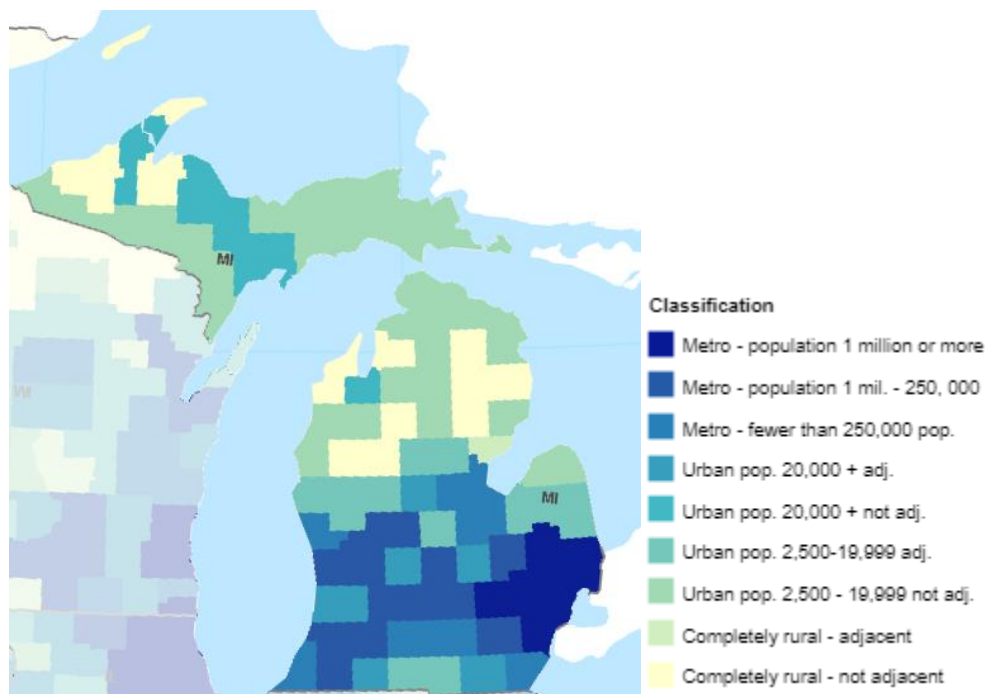

Partner organizations played a key role in promoting the survey through social media and community outreach. Promotional materials included flyers, social media content, and press releases. A total of 3,496 surveys were collected across the Region, with 267 responses coming from Gratiot County.

Demographics

The service area for MyMichigan Medical Center Alma is Gratiot County, located in the central region of Michigan's Lower Peninsula. Known for its rich agricultural heritage, scenic landscapes, and small-town charm, the county offers outdoor recreation opportunities such as biking, fishing, and hiking, particularly along the Pine River and the county's parks and trails. Covering over 570 square miles, Gratiot County is predominantly classified as rural by the U.S. Census Bureau—a key factor influencing access to health care, transportation, and other essential services.

Gratiot County is home to approximately 41,000 residents, with a population that reflects both rural and small urban communities. The majority of residents identify as White (over 90%), with smaller proportions identifying as Black or African American (approximately 2.2%), American Indian or Alaska Native (0.5%), Asian (0.4%), and individuals of two or more races (about 5%). Approximately 4% of the population identifies as Hispanic or Latino. These demographic characteristics underscore the importance of delivering culturally responsive care and addressing health disparities within the community.

Rurality By County

Figure 4: Rurality by County

Figure 5: Population by race

Gratiot County has a lower proportion of racial minority groups (9.4%) than Michigan (26%).

Figure 6: Percentage of population by age group

Gratiot County (18%) has higher proportions of adults over the age of 65 than Michigan overall (19.2%).

A greater proportion of people, 15.7%, of the people in the region have a disability compared to the State (10.3%).

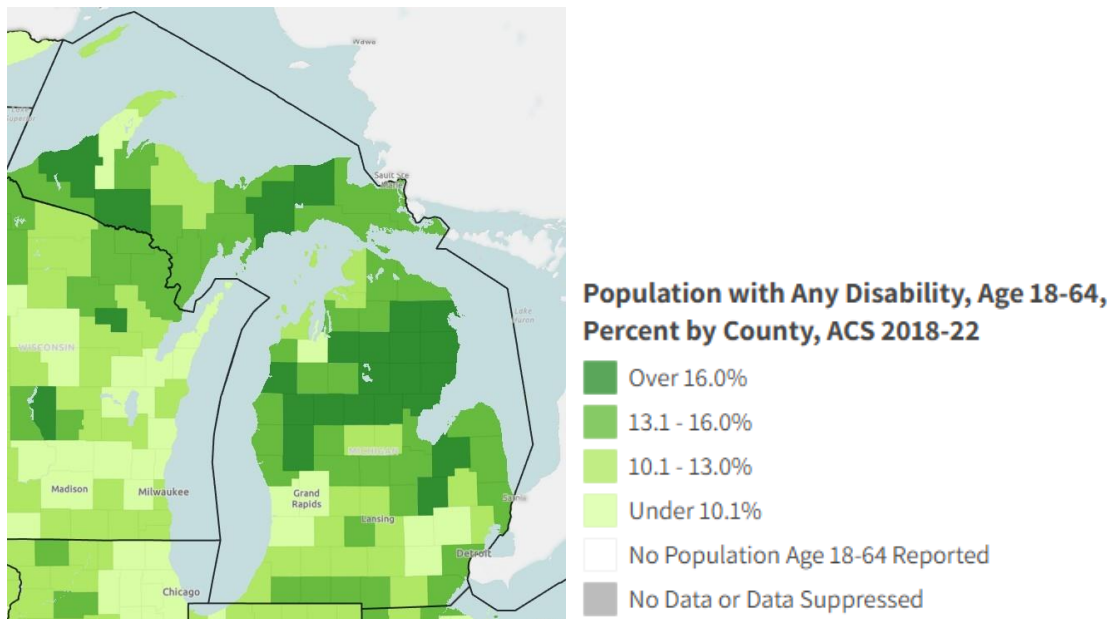

Figure 7: Map of population with any disability

Source: United States Census Bureau, 2018-2022

Notes: The U.S. Census Bureau has updated the data for individuals with disabilities to 2019-2023 estimates. However, the visualization data is only available for 2018-2022 data.

Chronic Conditions

Selected Morbidity and Mortality Indicators for the MyMichigan Medical Center Alma Service Area

Figure 8: Prevalence estimates of health indicators.

Notes: 'Poor Mental Health 14+ Days in past month' indicates the percentage of adults who stated that their mental health was not good 14 or more days in the past month, 2022.

'Adults ever diagnosed with COPD' shows the percentage of adults who have ever been diagnosed with Chronic Obstructive Pulmonary Disease (COPD), emphysema, or chronic bronchitis, 2022.

'Adults aged 20+ who are obese' shows the percentage of adults 20 and older who are obese using the Body Mass Index (BMI) value ≥ 30 , 2021.

'Adults aged 20+ who are sedentary' shows the percentage of adults who did not participate in any leisure-time activities (physical activities other than their regular job) during the past month, 2021. 'Self-Reported General Health Assessment: Poor or Fair' shows the percentage of adults who answered poor or fair to: "How is your general health?", 2022.

Figure 9: Cancer Incidence rates

Note: Incidence rates (cases per 100,000 population per year) are age-adjusted to the 2000 US standard population (19 age groups: <1, 1-4, 5-9, ..., 80-84, 85+). Rates are for invasive cancer only (except for bladder cancer which is invasive and in situ) or unless otherwise specified. Rates calculated using SEER*Stat. Population counts for denominators are based on Census populations as modified by NCI. The [US population Data File](#) is used for SEER and NPCR incidence rates.

Data not available for some combinations of geography, cancer site, age, and race/ethnicity.

Suppression is used to avoid misinterpretation when rates are unstable.

Figure 10: Mortality Rates

Figure 11: Substance Use Associated Mortality rates

Note: Data from Gratiot County was suppressed due to low response levels and has been omitted from this graph.

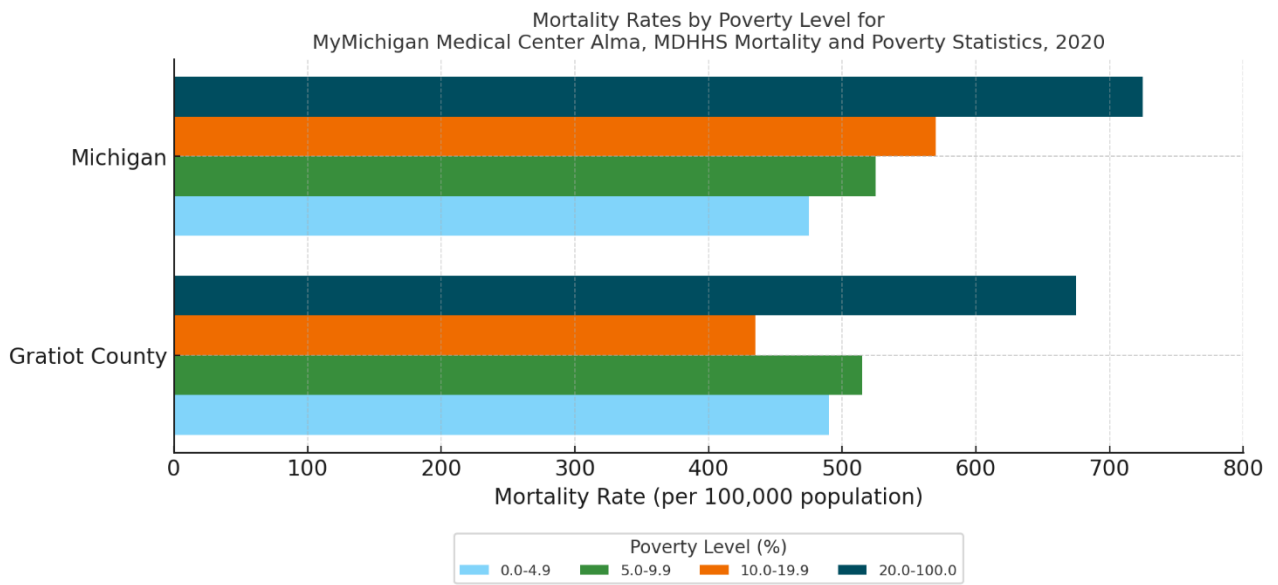

Figure 12: Age adjusted mortality rates by poverty level

Note: The poverty categories here refer to the percentage of residents in each census tract that live below the poverty line. Deaths have been organized by these categorizations. Any area with 20% or more of the population living below the poverty line is considered a poverty area by US Census reports. Age-adjustment was performed using the standardized population from the United States Census, 2000.

Mortality Rates by Race and Sex for MyMichigan Medical Center Alma
MDHHS Vital Statistics, 2022

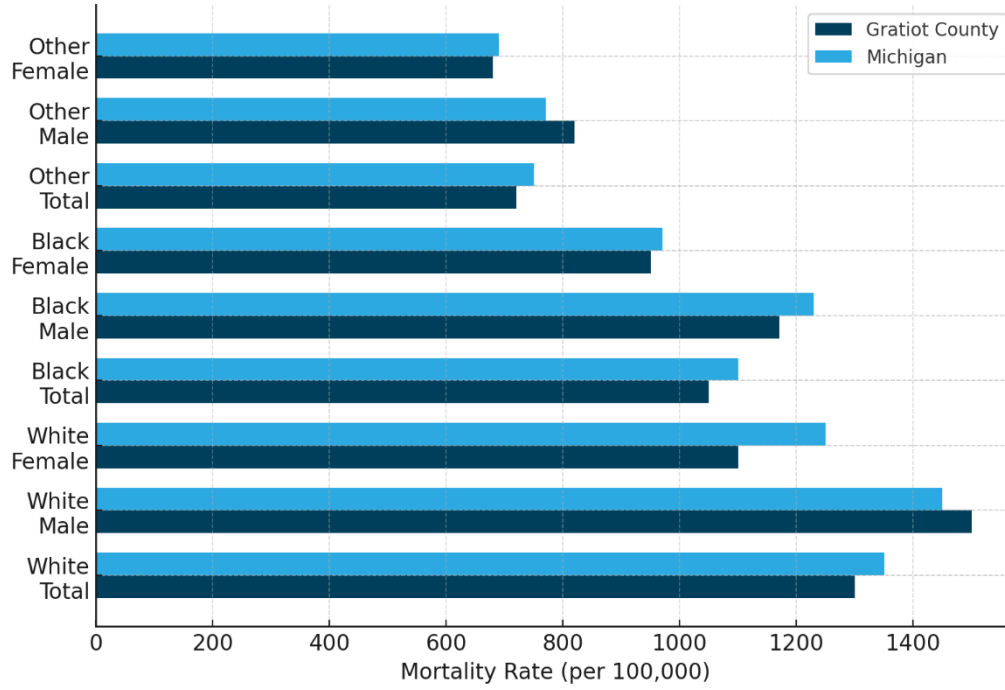

Figure 13: Mortality rates by race and sex

Social Determinant of Health

The Social Determinants of Health (SDOH) are classified as conditions in the environment in which people are born, work, live, or play that affect their health and quality of life outcomes. Areas often included in SDOH frameworks include healthcare access and quality, education access and quality, social and community context, neighborhood and built environment, and economic stability.

Social Determinants of Health

Figure 14: Social Determinants of Health

Economic Stability

Key issues within the economic stability function of SDOH include poverty, employment, food security, housing stability, and ALICE populations. ALICE is an acronym for Asset Limited, Income Constrained, yet Employed, and describes households that earn more than the Federal Poverty Level, but less than the basic cost of living for the county (i.e., those working, yet still struggling to have their basic needs met).

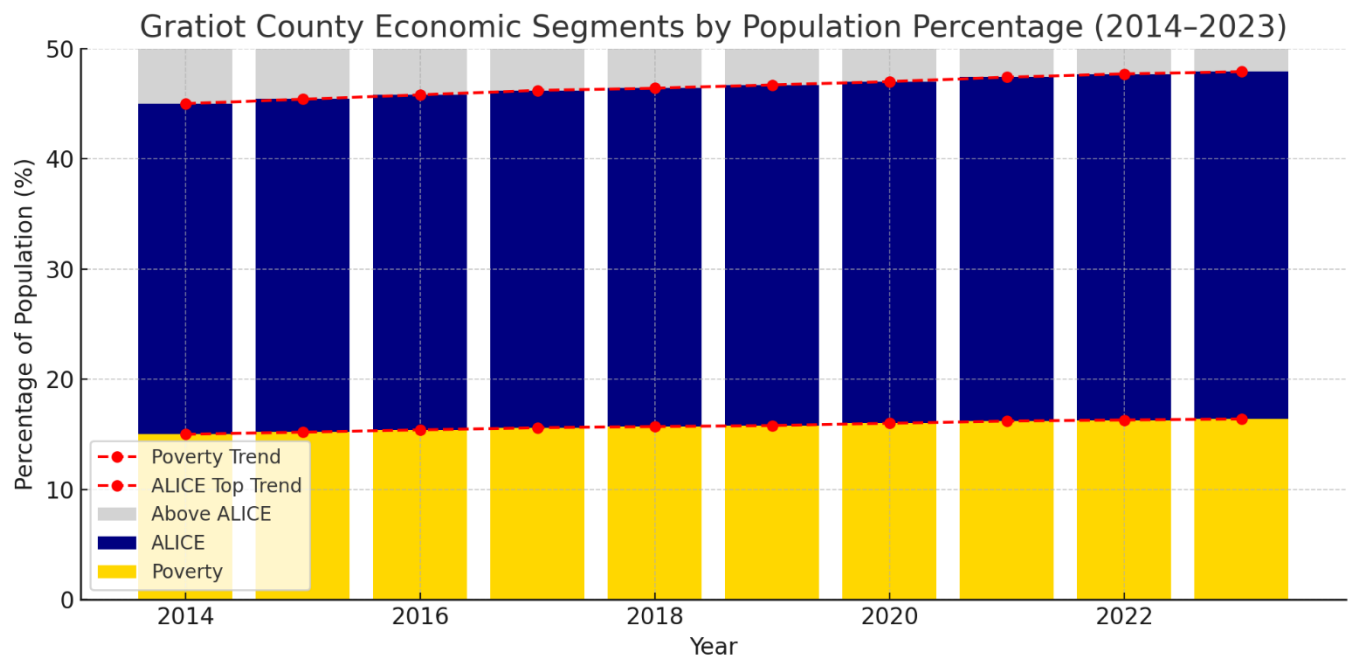

Figure 15: Poverty and ALICE in Gratiot County

Education

Education status is a key function within the SDOH framework. Key issues such as graduation rates, enrollment in higher education, language and literacy, and early childhood education all play a vital role in the health and wellbeing of a community.

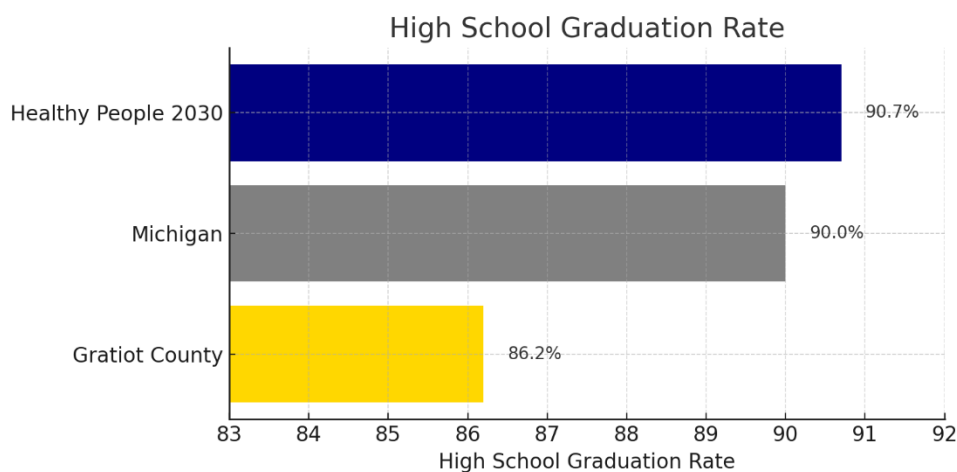

Figure 16: Continuing Education Gratiot County

Figure 17: High School Graduation Rate

Neighborhood and Built Environment

There are important connections between where an individual lives and their health and wellbeing. Factors such as neighborhood safety, transportation access, housing quality and standards, and air and water quality all play an important role in determining one's health status.

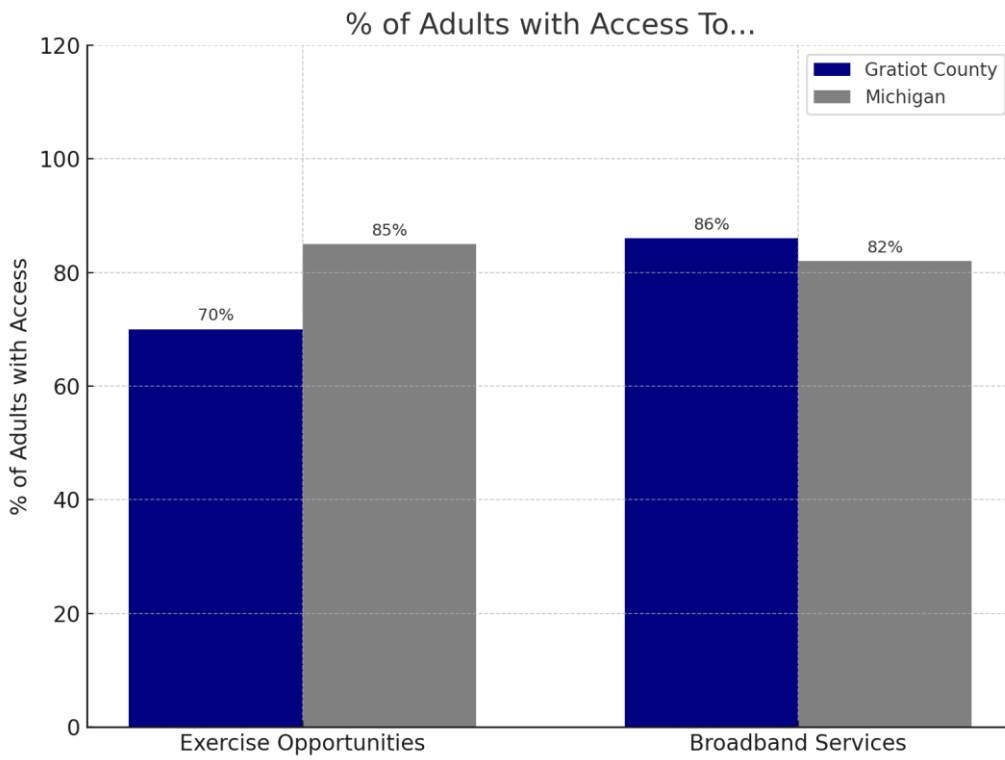

Figure 18: Percentage of Adults with Access to Services

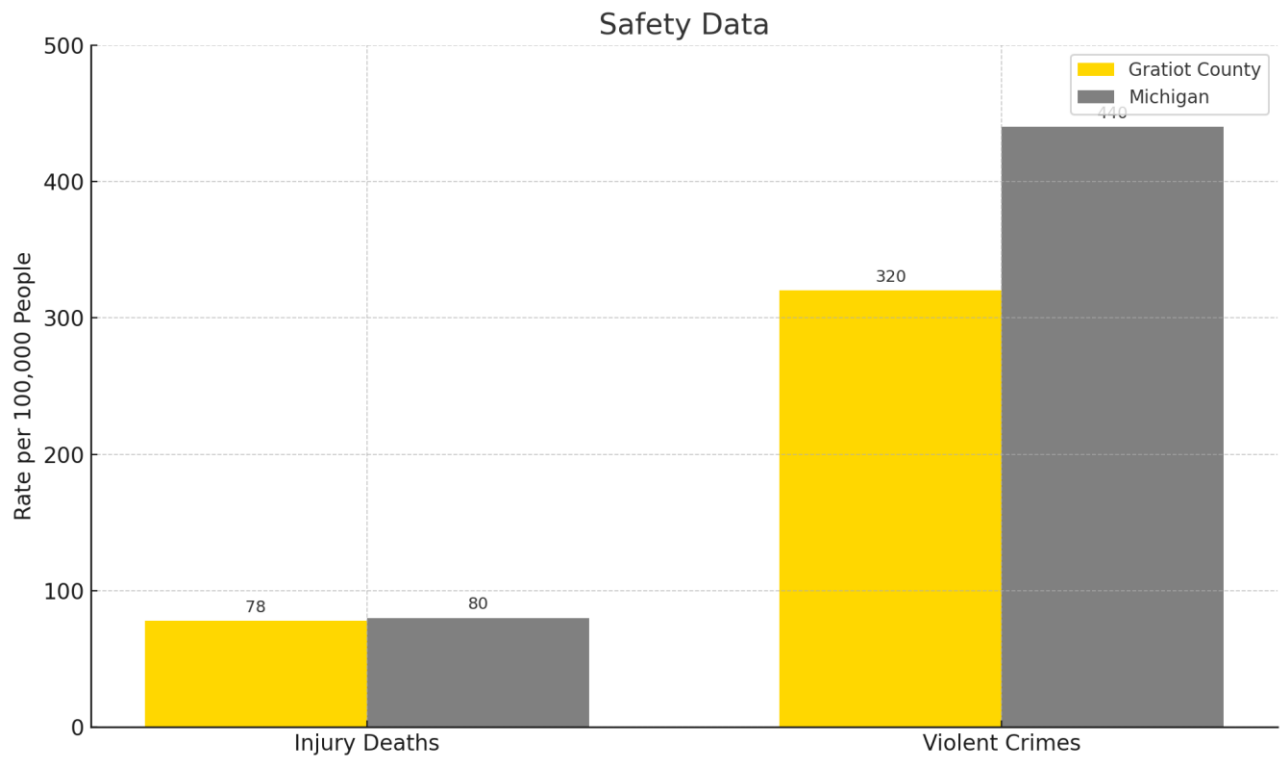

Figure 19: Safety Data per 100,000

Access to Care

Access to healthcare is a fundamental determinant of overall wellbeing, directly impacting disease prevention, early detection, and effective treatment. Limited access to healthcare services, whether due to cost, geographic barriers, timely appointment availability, logistical obstacles, or lack of insurance can lead to delayed diagnoses, unmanaged chronic conditions, and preventable health complications. Ensuring equitable access to both physical and mental health services is critical in improving quality of life and life expectancy across all communities.

In the state of Michigan, there are approximately 78 primary care providers per 100,000 residents (County Health Rankings, 2021), which is higher than the rate that is seen in Gratiot County (40 primary care providers per 100,000 residents). This makes it harder for residents to seek care for acute or chronic diseases. Similarly, data also shows that only 79.9 percent of residents in Gratiot County had received a routine health checkup within the last year (CDC PLACES, 2002). CDC PLACES data from 2022 also shows that 4.9 percent of adults in Gratiot County do not have health insurance. Lack of access to healthcare (such as not having health insurance) contributes disproportionately to age-adjusted death rates across the state. For example, the age-adjusted death rate due to heart disease was 243.1 deaths per 100,000 residents in Gratiot County. This is compared to the value across the entire state of Michigan, at 205.9 deaths per 100,000 residents (MDHHS, 2020-2022). Furthermore, age-adjusted death rate due to all cancer mortality from 2018 to 2022 shows Gratiot at 175.0 deaths per 100,000 residents, compared to the Michigan state-wide value at 158.3 deaths per 100,000 residents (MDHHS).

33.3 percent of respondents to the Community Survey from Gratiot County identified access to general medical care as one of the top factors for a thriving community. 30.3 percent similarly felt that high quality medical care was also a top factor for the community. Additionally, 11.9 percent of respondents indicated that access to general medical care was one of the top issues in their own community. In terms of what needs to be improved with access to care, 59.7 percent of respondents identified specialty services that were located too far away as one of their top issues with access; 53.7 percent of respondents implicated the overall cost of healthcare as a barrier. Healthcare providers for the area generally agreed; 52.9 percent indicated that access to general medical care was one of the top factors for a thriving community.

Barriers to healthcare access can create significant disparities in health outcomes. Individuals facing financial hardships, living in rural areas, or struggling with complex healthcare systems often experience gaps in care, leading to worsened health conditions and increased medical costs over time. Expanding healthcare access through affordable services, improved transportation, and enhanced health system navigation can reduce these disparities and improve population health.

Healthcare access is more than just the availability of medical services, it is about ensuring that individuals receive timely, high-quality care regardless of their socioeconomic status or geographic location. When people can access preventative care, manage chronic illnesses, and receive necessary treatments without financial or logistical obstacles, they are more likely to experience better health outcomes, improved well-being, and a higher quality of life.

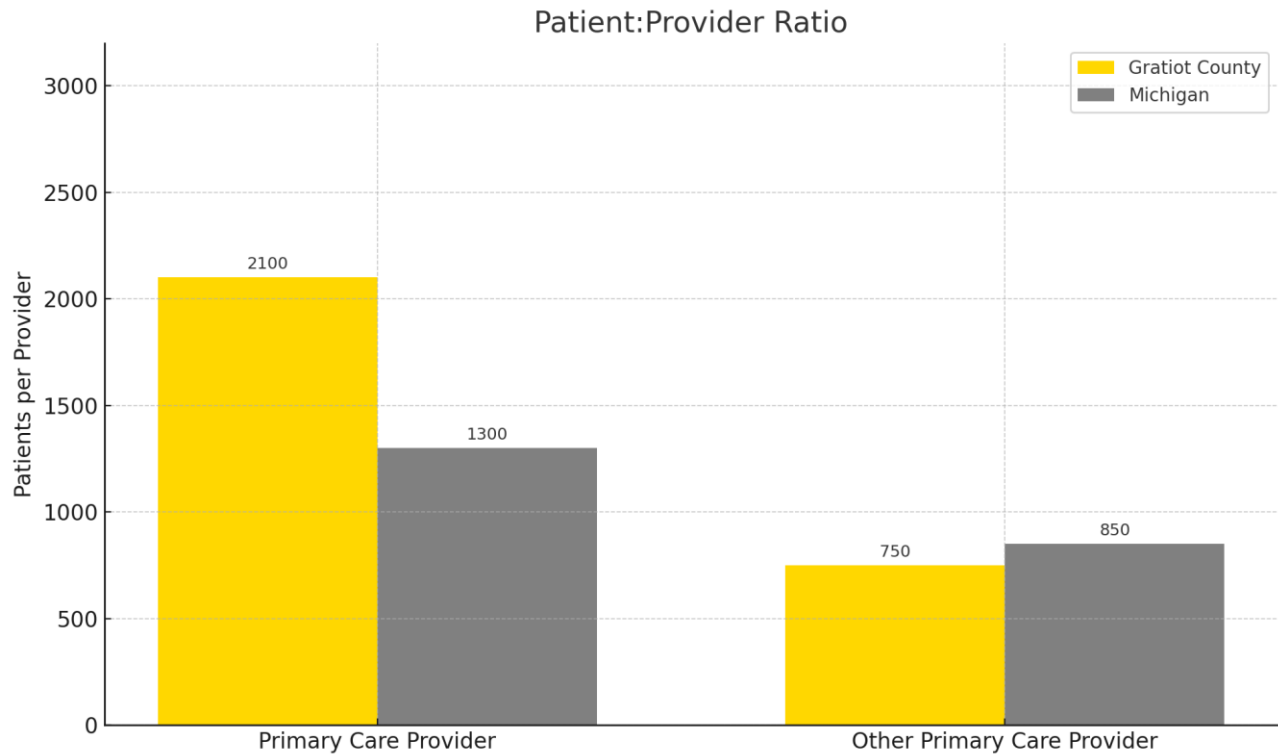

Figure 20: Provider Ratios

Primary Care Access

The patient-to-provider ratio is a critical indicator of access to primary care services. In areas like Gratiot County, where this ratio is significantly higher than the state average, it reflects a shortage of primary care providers and suggests that residents may experience longer wait times, reduced preventive care, and increased reliance on emergency services for non-emergent needs. Strengthening the primary care workforce is essential to improving health outcomes, managing chronic conditions, and ensuring timely, coordinated care—especially in rural and underserved communities. Addressing these gaps can lead to healthier populations and a more efficient health system.

Health Literacy

According to the Department of Health and Human Services, “health literacy is the degree to which individuals have the capacity to obtain, process and understand basic health information and services needed to make appropriate health decisions.” Health literacy impacts an individual’s ability to manage health conditions, communicate with providers, and seek appropriate care.

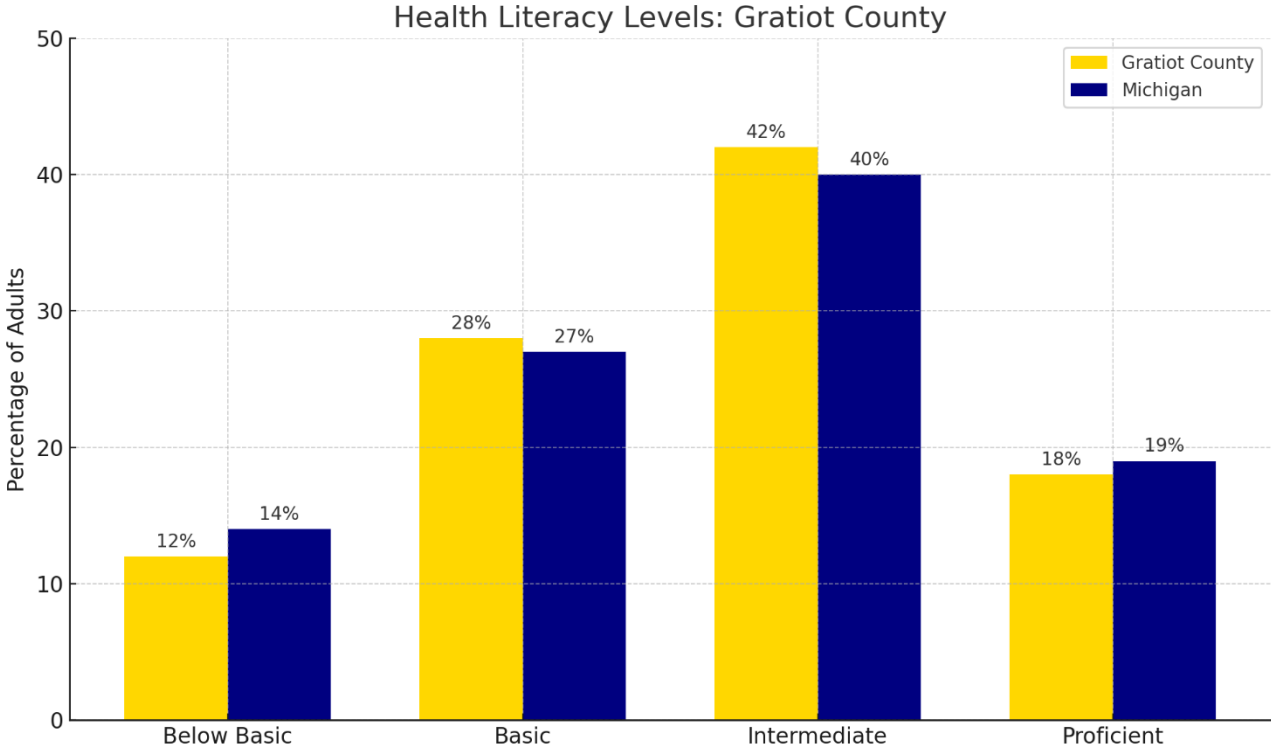

Figure 21: Health Literacy

Health Behaviors

Individual behavior plays a vital role in health outcomes. Health Behaviors are often times defined as the actions that affect our health. These actions could include behaviors that lead to improvements in health, such as physical activity, healthy eating, and participating in preventive health care. Equally, actions that lead to detriments in our health are also considered health behaviors. These actions include behaviors that increase our risk of disease development, including increased alcohol intake, substance misuse, and delaying prenatal care.

Figure 22: Cancer Screening Rates

of adults needed to see a doctor in the past 12 months but could not get an appointment.

Figure 23: Appointments in Last 12 Months

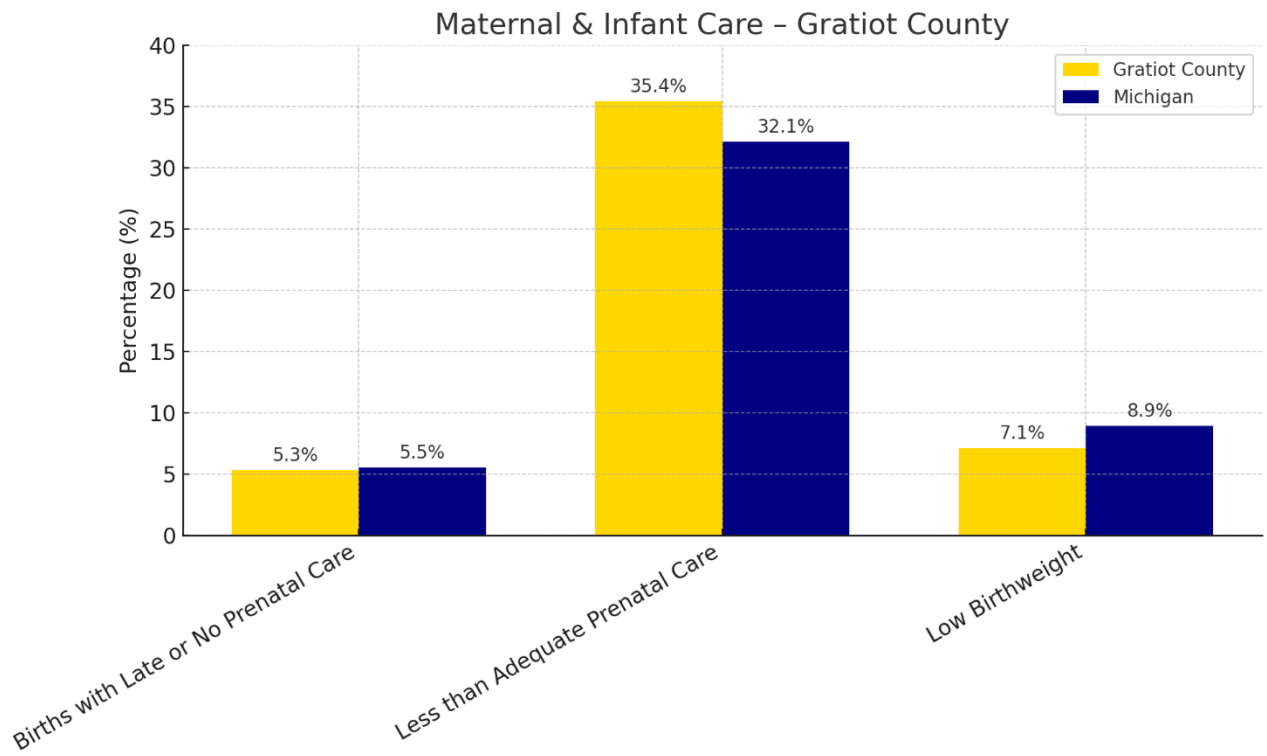

Figure 24: Health Behaviors – Maternal & Infant Care

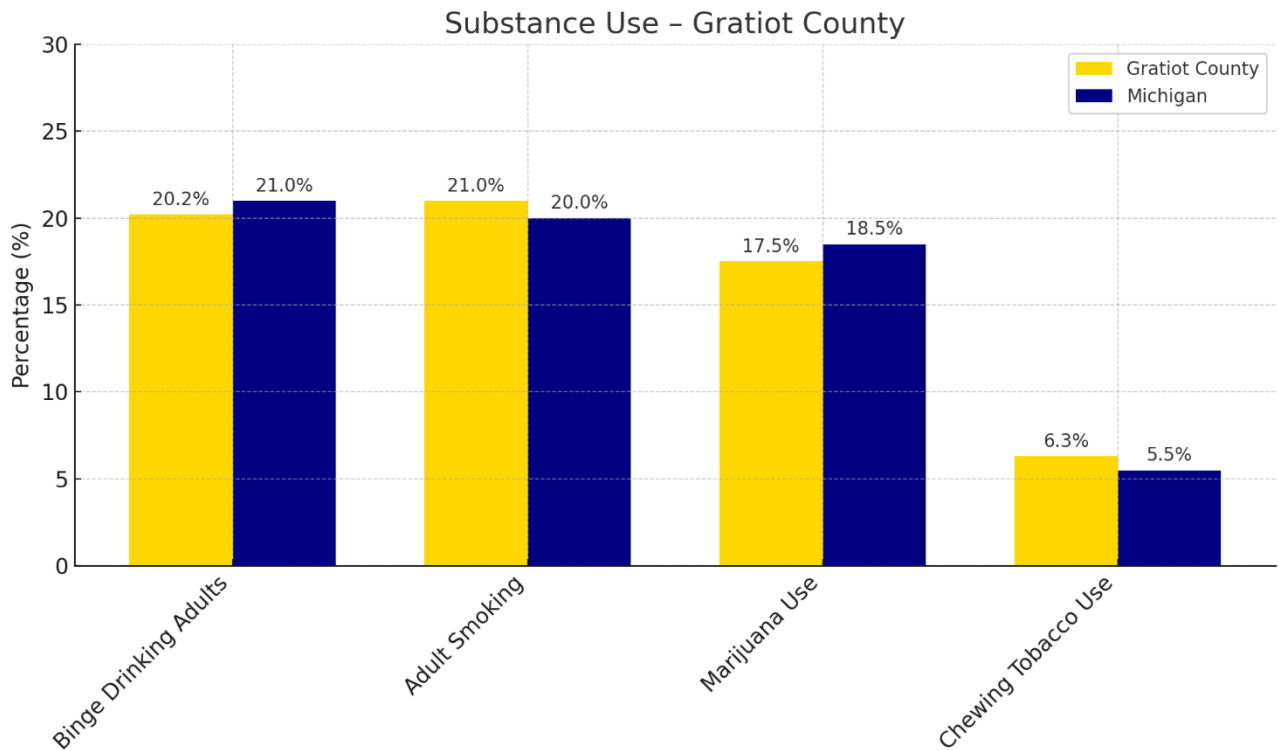

Figure 25: Health Behaviors – Substance Use

Behavioral Health

Mental health is essential to overall wellbeing, influencing relationships, daily functioning, and ability to lead fulfilling lives. It is deeply connected to physical health, as mental illness can increase the risk of chronic conditions such as heart disease, diabetes, and weakened immune function. Despite its critical role in overall health, many individuals face significant barriers to accessing mental health services, including cost, stigma, and provider shortages. Ensuring that everyone has access to timely, quality mental health care is key to fostering healthier individuals and communities.

Across the state of Michigan, there are approximately 336 mental health providers for every 100,000 residents (County Health Rankings, 2023). In comparison, Gratiot County has significantly lower rates of providers available to treat mental health disorders, at only 216 mental health providers per 100,000 residents. As the data shows, mental health conditions such as depression are being diagnosed more often within the county. CDC PLACES data from 2022 shows that 24.8 percent of adults in Gratiot County were currently or had previously been diagnosed with depression. According to MDHHS data from 2018 to 2022, the age-adjusted death rate for suicide mortality is relatively high within the area as well. Overall, the state of Michigan has 14.4 suicide deaths per 100,000 residents. During the same timeframe, Gratiot County exhibited 25.2 suicide deaths per 100,000 residents.

36.4 percent of respondents to the community survey from Gratiot County identified that help for mental health and emotions was an important factor for a community to be considered thriving. 32.8 percent of respondents also indicated that one of the top issues in their community was a lack of mental health services. This was largely driven by responses from individuals who were over the age of 40 or who relied on employer-sponsored insurance. Providers indicated that mental health services were important for a thriving community, with 52.9 percent identifying it as a top factor. 47.1 percent of providers thought that some form of mental health service was missing from their community.

Barriers to mental health services can lead to untreated conditions, exacerbating issues such as anxiety, depression, and substance use disorders. Limited availability of mental health professionals, high costs of therapy and medications, and a lack of awareness about available resources prevent many from seeking the help they need. Addressing these barriers by expanding affordable services, increasing provider availability, and integrating mental health into primary care can improve mental health outcomes and enhance overall wellbeing.

Access to mental health care goes beyond treatment—it encompasses early intervention, crisis support, and long-term management of mental health conditions. When individuals receive the mental health services they need, they are better able to manage stress, maintain healthy relationships, and contribute positively to their communities.

Community Survey

Top Ten Factors for a Thriving Community as Identified by Gratiot Residents, MiThrive Community Health Survey, 2024 (n=267)

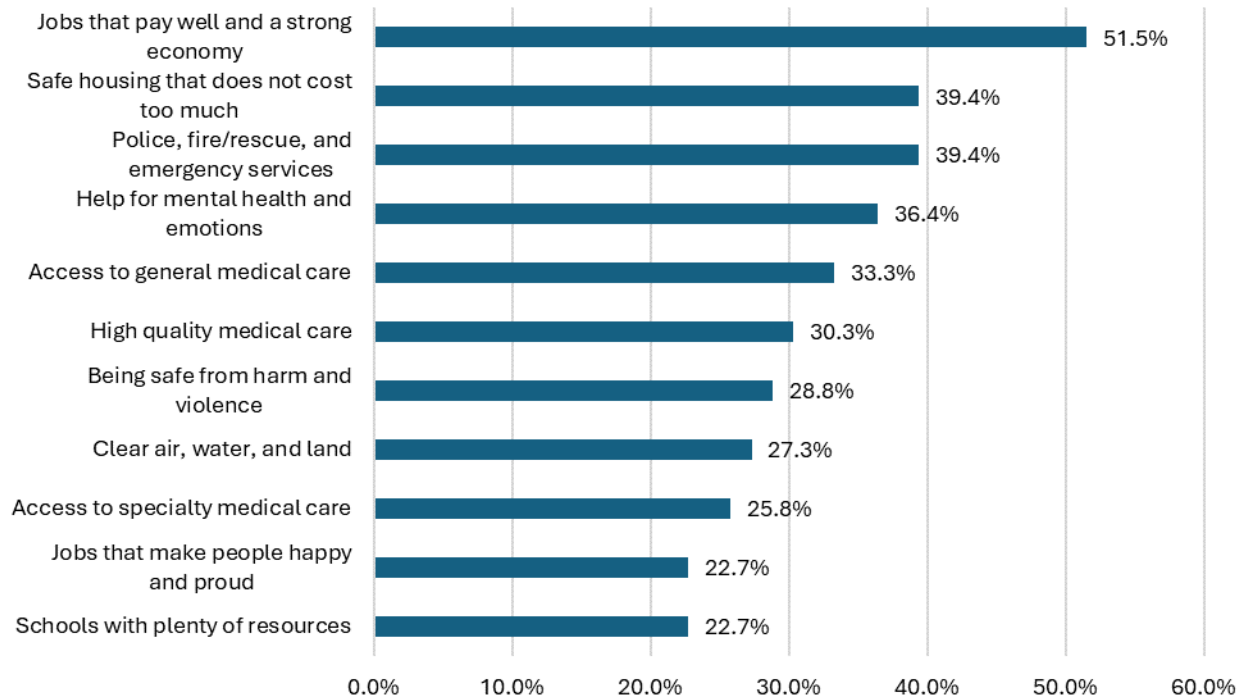

Figure 29: Top Ten factors for a thriving community

Note: This figure, “Top Ten Factors for a Thriving Community”, is connected to the following four figures, each of which displays the proportionate demographic breakdown of the data above. This can help readers better understand how these groups in the community feel that they are connected to these factors.

Top Ten Factors for a Thriving Community as Identified by Gratiot Residents by Age in Years, MiThrive Community Survey, 2024 (n=267)

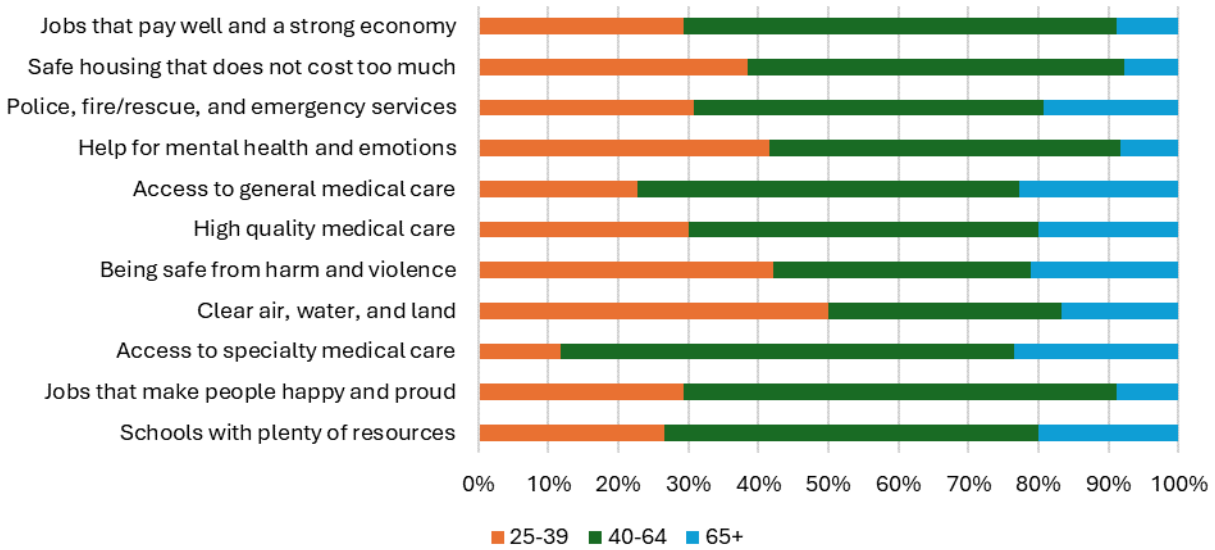

Figure 30: Top ten factors for a thriving community by age

A greater proportion of individuals **under 40 years of age** responded that **safe housing that doesn't cost too much** was an important factor for a thriving community.

Top Ten Factors for a Thriving Community as Identified by Gratiot Residents by Yearly Household Income, MiThrive Community Survey, 2024 (n=267)

Figure 31: Top ten factors for a thriving community by income

Safe housing that does not cost too much was a more important factor for individuals from households making under \$60,000 a year.

Top Ten Factors for a Thriving Community as Identified by Gratiot Residents by Insurance Type, MiThrive Community Survey, 2024 (n=267)

Figure 32: Top ten factors for a thriving community by insurance

High quality medical care as a factor for a thriving community had a larger proportion of individuals who **Medicaid, Medicare, or insurance exchange/marketplace** plans compared to other factors.

Top Ten Factors for a Thriving Community as Identified by Gratiot Residents by Race and Ethnicity, MiThrive Community Survey, 2024 (n=267)

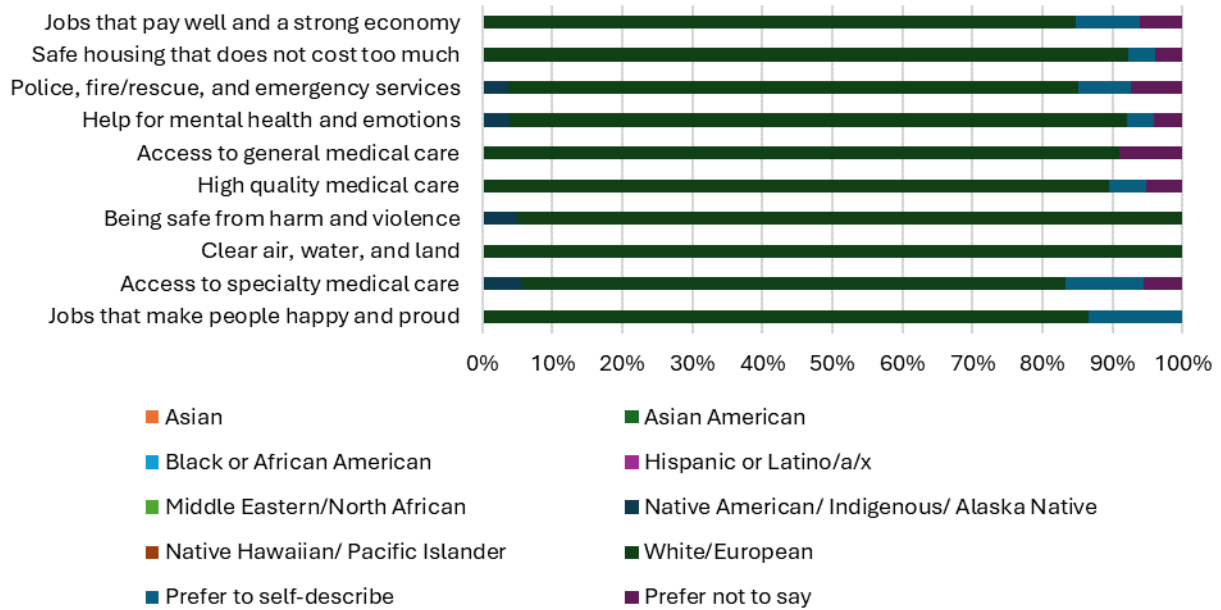

Figure 33: Top ten factors for a thriving community by Race and Ethnicity

Jobs that pay well and a strong economy was identified as an important factor for respondents who identified as part of a **racial or ethnic minority**. This is also true for the factor of **high-quality medical care**.

Top Ten Issues Impacting the Community as Identified by Gratiot Residents, MiThrive Community Health Survey, 2024 (n=267)

Figure 34: Top ten Issues Impacting the Community

This figure, “Top Ten Issues Impacting the Community”, is connected to the following four figures, each of which displays the proportionate demographic breakdown of the data above. This can help readers better understand how these groups in the community feel that they are connected to these issues.

Top Ten Issues Impacting the Thriving Community as Identified by Gratiot Residents by Age in Years, MiThrive Community Survey, 2024 (n=267)

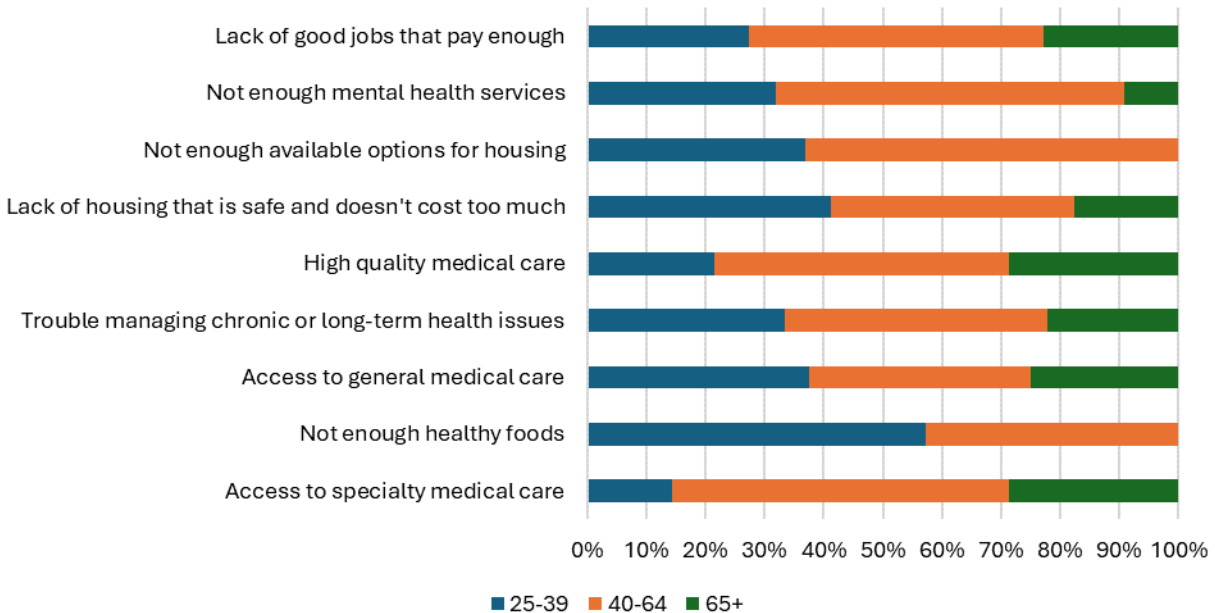

Figure 35: Top ten Issues Impacting the Community by Age

Residents **under the age of 40** disproportionately identified having **not enough available options for housing** as a major issue in their community. This was also true for the issue **not enough healthy foods**.

Top Ten Issues Impacting the Community as Identified by Gratiot Residents by Yearly Household Income, MiThrive Community Survey, 2024 (n=267)

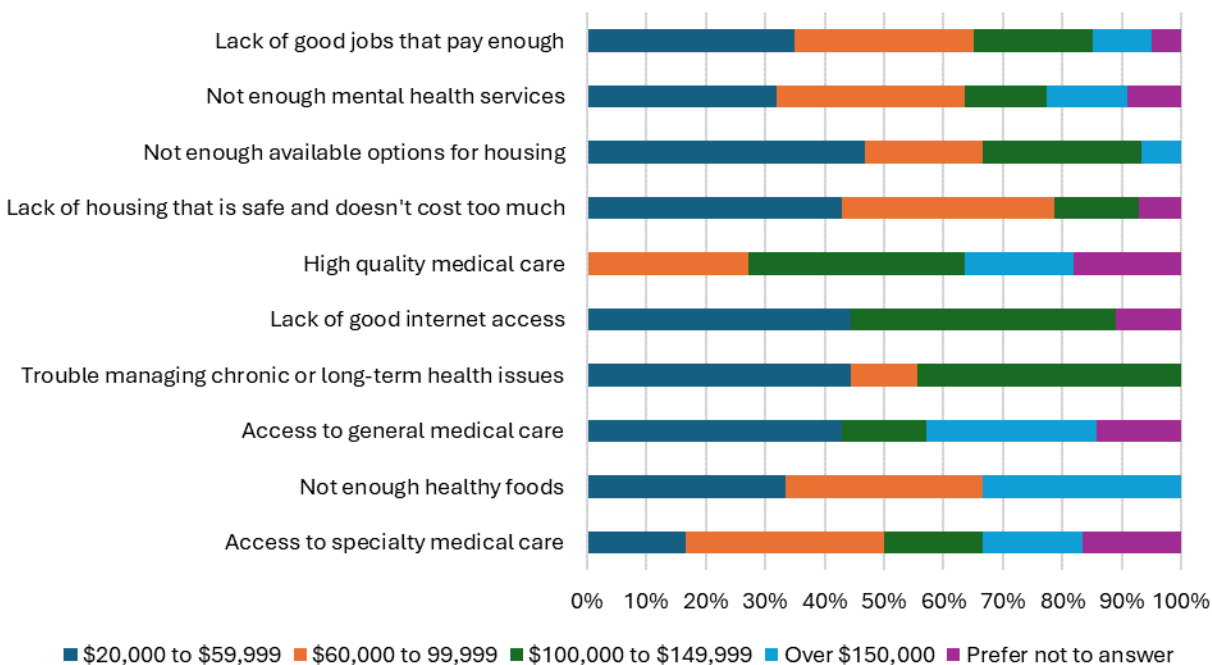

Figure 36: Top ten issues impacting community by Income.

Issues with **access to general medical care** was an important issue for respondents making **less than \$60,000 a year** in their household.

Top Ten Issues Impacting the Community as Identified by Gratiot Residents by Insurance Type, MiThrive Community Survey, 2024 (n=267)

Figure 37: Top ten issues impacting community by Insurance Type

Residents with **Medicaid, Medicare, or insurance from the marketplace** felt that a major issue in the community involved there being a lack of **high-quality medical care**.

Top Ten Issues Impacting the Community as Identified by Gratiot Residents by Race and Ethnicity, MiThrive Community Survey, 2024 (n=267)

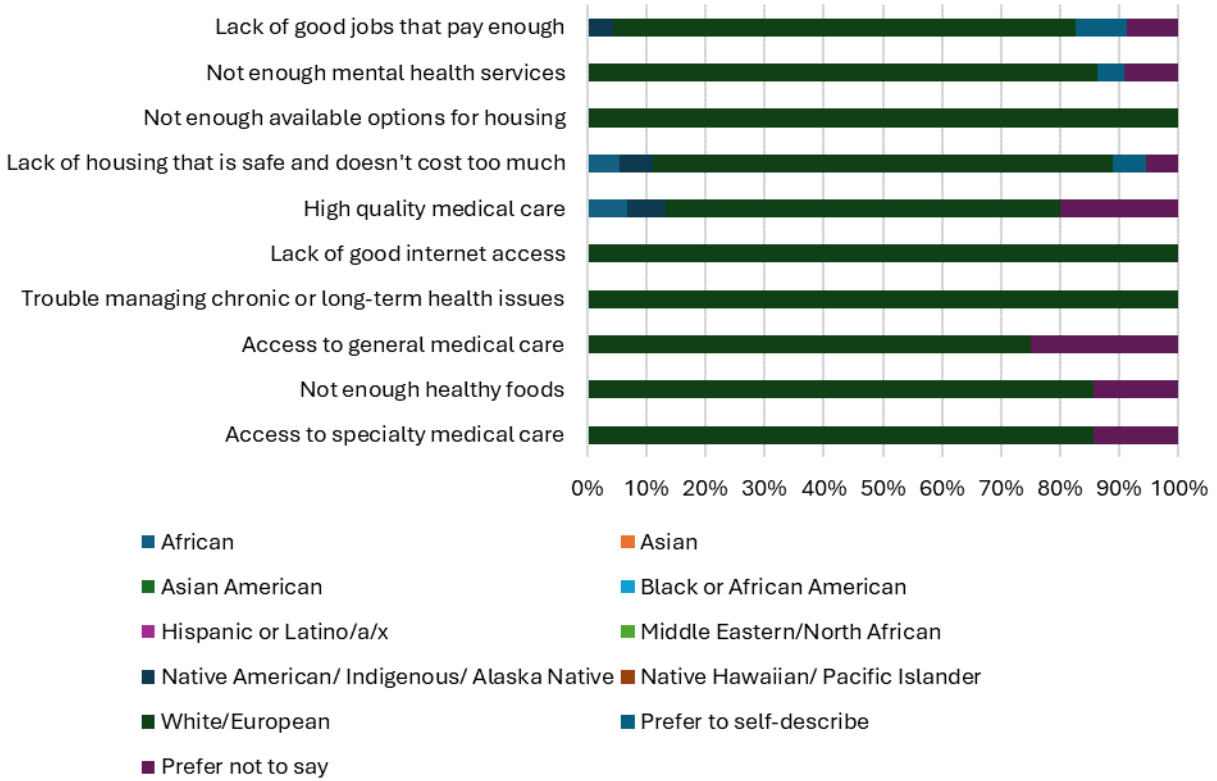

Figure 38: Top ten issues impacting the community by race and ethnicity.

There were very few responses from respondents who identified as part of a **racial or ethnic minority**.

Responses to Likert Scale Questions as Identified by Gratiot Residents, MiThrive Community Survey, 2024 (n=267)

Figure 39: Likert Scale Questions

Dark blue indicates “Strongly agree” responses, light blue indicates “Agree” responses, grey represents the undecided or “I don’t know” responses, light red indicates “Disagree” responses, and dark red indicates “Strongly disagree” responses. Data shows that respondents felt that their community was a safe place to live, but most also expressed that there were not enough jobs, access to healthy foods, or enough affordable housing available in the community.

Most Concerning Medical Conditions in the Community According to Gratiot Residents, MiThrive Community Survey, 2024 (n=267)

Figure 42: Top Issues Preventing Increased Physical Activity

Healthcare Provider Survey

Data for the Healthcare Provider Survey was collected through additional questions included at the end of the Community Survey. Respondents who identified themselves as healthcare providers or healthcare staff were presented with six extra questions to capture their specialized perspective on the community's overall health and needs. The survey remained open from August 12, 2024, to October 6, 2024.

Healthcare partners, including hospitals, federally qualified health centers, and local health departments, distributed the survey electronically to physicians, nurses, and other clinicians. Partner organizations further supported outreach by sharing the survey link with external community partners. A total of 17 providers completed the healthcare provider section of the community survey in Gratiot County.

Figure 47: Top Issues Impacting the Community According to Healthcare Staff

Community Partner Assessment (CPA)

The Community Partner Assessment focuses on organizations that contribute to well-being. The CPA answers the following questions:

- What are the components, activities, competencies, and capacities in the regional system?
- How are services being provided to residents?

The assessment was designed to enhance communication between organizations and the community by bringing together a diverse range of partners. It aimed to explore connections within the community system, highlight strengths, and identify opportunities for improvement. The Community Partner Assessment included two key components: the Community Partner Assessment Survey and two virtual Community Partner Assessment Discussions events.

From May 6, 2024, to June 3, 2024, 75 community partners from various organizations and sectors across the county participated in a community partner survey to assess the system's capacity. A total of 12 responses came from partners covering Gratiot County.

Additionally, survey participants were then invited to attend one of two virtual facilitated discussions, held on June 27, 2024, and July 10, 2024, allowing community partners to identify system strengths and areas for improvement collectively.

Figure 48: Alma Partner's Top Interests in Joining a Community Health Improvement Partnership

Gratiot Partners Sector Engagement At Least Once within the Last Year, MiThrive Community Partner Assessment, 2024 (n=24)

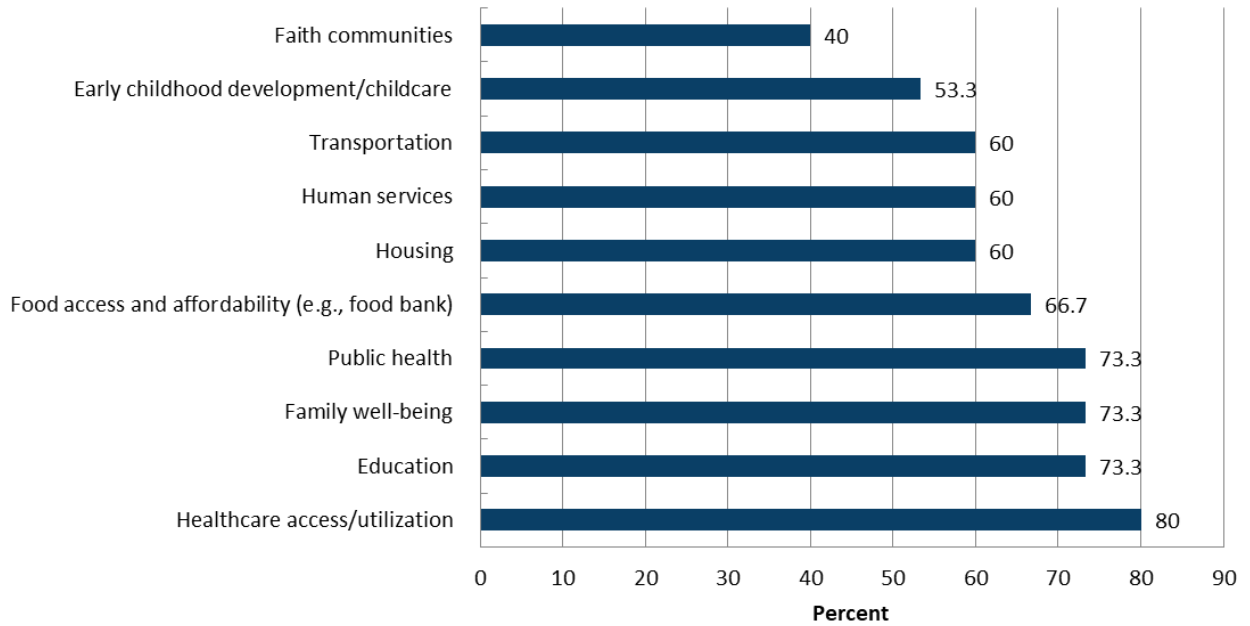

Figure 49: Partners Sector Engagement At least Once within last year

Organization's Policy & Advocacy Work Priorities for Arenac Partners, MiThrive Community Partner Assessment, 2024 (n=12)

Figure 50: Organization's Policy & Advocacy Work Priorities

Prioritization Process

Once both the primary and secondary data was collected, community health needs were determined and prioritized by reviewing qualitative and quantitative data. For Stage I, the Community Health team reviewed the collected health indicator data and identified data that demonstrated poor performance against established benchmarks (i.e., Michigan state averages or HealthyPeople 2030 goals). Once these health needs were identified, the External Advisory Committee assisted in theming and prioritizing the data points using the Hanlon Method.

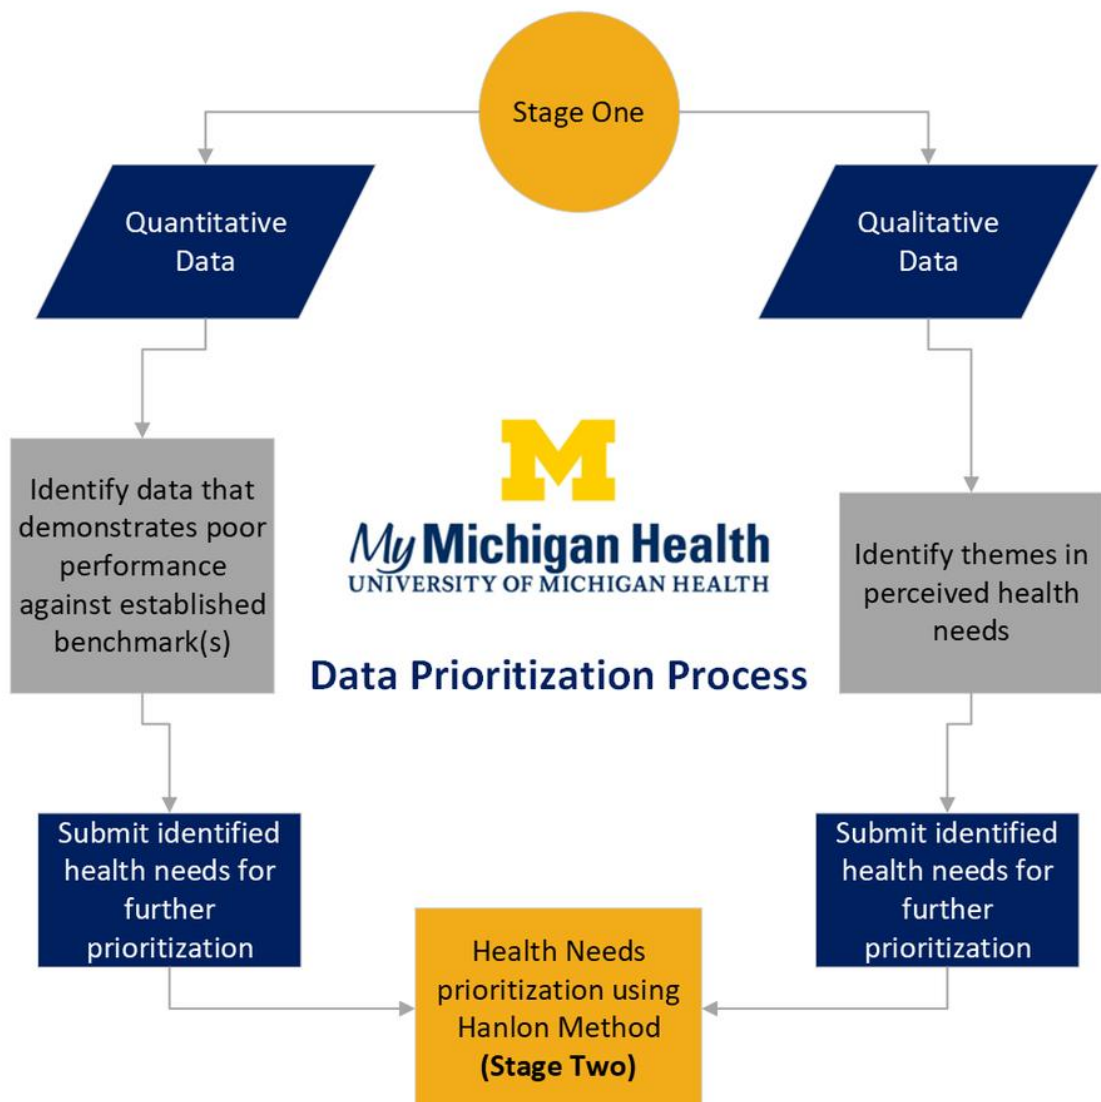

Figure 51: Data Prioritization Process

Rating	Burden of Illness (% of population with health problem)	Burden of Death (seriousness of health problem)	Effectiveness of Interventions
9 or 10	>25%	Very Serious	<5% Effective
7 or 8	10% - 24.9%	Relatively Serious	5 – 19.99% Effective
5 or 6	1% - 9.9%	Serious	20 – 39.99% Effective
3 or 4	0.1% - 0.9%	Moderately Serious	40 – 59.99% Effective
1 or 2	0.01% - 0.09%	Relatively Not Serious	60 – 79.99% Effective
0	<0.01%	Not Serious	80 – 100% Effective

Priority Score Calculation Formula

$$D = [A + (2 \times B)] \times C$$

- Osceola
- Oscoda
- Otsego
- Presque Isle
- Roscommon
- Wexford

() Other - Write In: _____

2) In the following list, which five assets do you think are **the most important factors for a community to be considered "thriving"?** Please select up to **five** options.

- Healthy food
- Safe housing that does not cost too much
- High quality medical care
- Access to general medical care
- Access to specialty medical care
- Help for mental health and emotions
- Parks and green spaces
- Safe and reliable childcare
- A strong sense of community among residents
- Stopping people from getting sick
- Helping people with long term sickness feel better
- Being safe from harm and violence
- Low substance use or drug use (alcohol, marijuana, tobacco, e-cigarettes, opioid, and narcotic-use)
- Jobs that make people happy and proud
- Jobs that pay well and a strong economy
- Clear air, water, and land
- Community members who are helping out and getting involved in the community
- Lifelong learning
- Schools with plenty of resources
- Transportation that you can count on
- Fun events that show different kinds of art and culture
- Being accepted as part of the community
- Low levels of crime
- Police, fire/rescue, and emergency services
- Ease of use for people with physical and/or mental disabilities
- Other - Write In: _____

3) Please indicate how strongly you **agree or disagree** with each of the following statements. Please select **one** option per statement.

	Strongly Agree	Agree	Disagree	Strongly Disagree	I don't know
My community is a safe place to live.	()	()	()	()	()

My community is a good place to raise children.	()	()	()	()	()
My community is a good place to grow old.	()	()	()	()	()
There are enough jobs in my community that pay well.	()	()	()	()	()
People in my community have good jobs that pay enough.	()	()	()	()	()
My community has enough access to healthy food that doesn't cost too much.	()	()	()	()	()
There is enough housing available in my community that doesn't cost too much.	()	()	()	()	()
There are housing and support services available for older adults in my community.	()	()	()	()	()
My community has safe drinking water and clean air.	()	()	()	()	()
There are enough parks and other places for fun and physical activity in my community.	()	()	()	()	()
There is a strong sense of community among the people where I live.	()	()	()	()	()
I feel welcomed and accepted by the other people in my community.	()	()	()	()	()
There are no problems with discrimination or negative attitudes/behaviors/thoughts in my community based on race, gender, income, or other factors.	()	()	()	()	()

4) In the following list, what do you think are the **three most concerning medical conditions impacting your community**? Please select up to **three** options.

- Aging problems (e.g., arthritis, hearing/vision loss, etc.)
- Alzheimer's disease/dementia
- Cancer
- COVID-19
- Diabetes
- Heart disease and stroke
- High blood pressure
- HIV/AIDS
- Infant death
- Infectious diseases (e.g., hepatitis, tuberculosis, etc.)
- Kidney disease
- Liver disease
- Issues during pregnancy or giving birth
- Mental and/or behavioral diseases
- Pneumonia/ Flu
- Respiratory/lung disease (such as asthma and COPD)
- Sexually transmitted infections (STIs)
- Substance use disorders (SUDs)
- Injuries due to accidents
- Obesity
- Other - Write In: _____

5) In the following list, what are the **three most important concerns within your community** that should be addressed? Please select up to **three** options.

- Aging problems (e.g., arthritis, hearing/vision loss, etc.)
- Child abuse/neglect
- Not enough oral/ dental healthcare services
- Domestic and sexual violence
- Lack of good jobs that pay enough
- Homicide, or people ending the lives of other people
- Discrimination or negative attitudes/behaviors/thoughts based on race, gender, income, or other factors
- High quality medical care
- Access to general medical care
- Access to specialty medical care
- Not enough substance use disorder (SUD) services
- Suicide, or people ending their own lives
- Teenage pregnancy
- Not enough maternal care services

- Pollution (bad air and water quality)
- Not enough educational opportunities
- Firearm-related or gun-related injuries
- Not enough mental health services
- Motor vehicle/traffic accidents
- Lack of usable parks and green spaces
- Not enough healthy foods
- Not enough options for transportation
- Lack of transportation that is safe and doesn't cost too much
- {Lack of good mental health services}
- Lack of good schools and education
- Not enough available options for housing
- Lack of housing that is safe and doesn't cost too much
- Lack of good internet access
- Not enough arts and culture
- Police, fire/rescue, or emergency services
- Trouble managing chronic or long-term health issues
- Sense or of community
- Other - Write In: _____

6) Please indicate whether you think you have **easy access (or the ability to find and receive services)** to each of the following. Please select **one** option per statement.

	Yes, I have easy access	No, I do not have easy access	Does not apply to me
Health information from a source I trust	()	()	()
Family planning services	()	()	()
Good food that doesn't cost too much	()	()	()
Health services for children	()	()	()
Immunizations/Vaccinations	()	()	()
Mental health services	()	()	()
Oral/dental health services	()	()	()
Prenatal care/health care for pregnancy	()	()	()

Primary care services	()	()	()
Sexual health testing and treatment	()	()	()
Services for those with substance-use or drug-use issues	()	()	()
Housing services	()	()	()
Childcare services	()	()	()
Services or care for people with dementia	()	()	()
Supports for the health and wellness of caregivers	()	()	()
Broadband access	()	()	()

7) From the list below, which resources or services are **missing in your community** that would benefit you? Please select **all** options that apply to you.

- Housing
- Food
- Transportation
- Mental Health
- Financial Support
- Domestic Violence Services
- Education
- Primary Care
- Childcare
- Substance-use Services
- Dental Health
- Internet (broadband, satellite, etc.)
- Language or translation services
- I feel there are enough services and resources in my community
- Other - Write In: _____

8) Which of the following factors do you experience that make it **harder for you to use health care services**? Please select **all** options that apply to you.

- Cost of healthcare (premiums, deductible, copay)
- Difficulty getting an appointment due to your provider not having enough available timeslots
- No appointment times that fit your schedule (day/night/weekends etc.)

- Issues with knowing how to use technology-based scheduling or appointments

Thank You!

Thank you for your time and energy to complete this survey.

[Click here to enter for a chance to win a \\$50 gift card.](#)

Your personal information will not be connected to your survey responses. The same link will also allow you to indicate if you are interested in additional opportunities to provide feedback or participate in opportunities to support health improvement in your community.

More opportunities to get involved:

If you're interested in engaging more, we invite you to participate in the MiThrive photovoice. All participants will be entered into a \$50 gift card drawing.

Take and submit photos and stories to share your perspective on your community. We want to hear from you on what makes your community a great place to live—or where it could improve – through the lens of your camera.
